Software Engineer

As a Software Engineer with a strong background in sales, I possess a unique blend of analytical, technical, and client relationship acumen. My expertise in navigating complex financial data combined with my sales-driven mindset enables me to address coding challenges with a strategic and systematic approach, ensuring optimized and impactful solutions. Proficient in Javascript, Python, and diverse databases, I easily adapt to diverse technical landscapes and collaborate effectively with cross-disciplinary teams. My commitment to ongoing growth within software engineering is anchored by a client-centric philosophy, ensuring tailored solutions that resonate with each client's distinct needs.

TECHNICAL & INTERPERSONAL SKILLS

Languages: Python, JavaScript, Ruby, HTML, CSS, SQL, Typescript, EJS

Libraries and Frameworks: React, Express.js, Django, Rails, Jquery, Bootstrap, Semantic

Databases and other: PostgreSQL, MongoDB, RESTful Routing, JSON API

Interpersonal skills: Problem Solving, Effective Communicator, Team Collaboration, Adaptable

TECHNICAL PROJECTS

Tipsy Traveler - HTML | Javascript | Bootstrap | Ruby on Rails | React.js | Postgresql

October 2023

An app that allows users to explore various locations and discover the best bars and drinks in their city.

- Implemented collaborative data management allowing users to actively contribute by editing, adding, and removing locations.
- Designed an intuitive user interface which enables users to explore and uncover the best bars in their area.
- Collaborated with designers to translate concepts into functional interfaces for a visually appealing interface.

Bon Voyage - HTML | Javascript | CSS | SASS | Express.js | React.js | MongoDB

August 2023

Your personalized digital companion to streamline and enhance your travel aspirations.

- Collaborated with a cross-functional team to design, develop, and launch a user-centric application.
- Implemented robust authentication protocols, ensuring secure user data management and protection against unauthorized access.
- Optimized app performance and user experience through iterative testing and feedback, resulting in increased user retention.

Weathernaut - Javascript | HTML5 | CSS | Openweather API

June 2023

Gathers real time weather data and alerts

- Deployed current and future weather based on your city
- Implemented a NASA API that results the picture of the day from the web
- Designed a horoscope widget which gets your reading for the day

EXPERIENCE

Mortgage Broker/Loan Officer | Allied Mortgage Group Inc | Hicksville, NY

07/2020 - Present

- Implemented a mortgage tracking system for automated follow ups to current and previous clients, which led to a 25% increase in productivity for fellow mortgage brokers.
- Spearheaded a service which allows clients to receive better rates, increasing client retention by 50% and an increase in new clients by 25%, during a time of especially high rates.
- Modernized our client experience by automating emails and updates throughout their mortgage process.

Supervisor | Stony Brook University Hospital | Stony Brook, NY

05/2017 - 07/2020

- Improved client experience by troubleshooting and resolving technical issues with computers & machines, ensuring seamless operation and minimizing downtime.
- Developed comprehensive training materials and conducted hands-on sessions to familiarize new hires with computer systems and software applications.
- Monitored trainees' performance and conducted assessments to ensure competence with using computers and machines

EDUCATION

General Assembly Software Engineering Immersive | Remote | Certificate of Completion

Oct 2023

420+ hour program focused on product development fundamentals, object-oriented programming, MVC frameworks, data modeling, and team collaboration strategies.

Stony Brook University, BS in Business Management

Stony Brook, New York, 2020
